## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 07/31/2006 has been entered.

### ***Allowable Subject Matter***

Claims 31-39 are allowed.

The following is an examiner's statement of reasons for allowance: claims 31-39 are allowed because the references cited fail to teach, as applicant has, subtracting the ideal upper layer in-phase signal from the layered in-phase signal to produce the lower layer in-phase signal and subtracting the ideal upper layer quadrature signal from the layered quadrature signal to produce the lower layer quadrature signal; converting the lower layer in-phase signal and the lower layer quadrature signal to a lower layer in-phase analog signal and a lower layer quadrature analog signal; and modulating the lower layer in-phase analog signal and the lower layer quadrature analog signal to produce a single layer signal, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zimmerman (US 5577067 A) discloses a portable, two-part electronic data acquisition and storage system used in the field to facilitate alignment and realignment of telecommunications equipment. This reference seems to be intended for consideration in the IDS filed on 08/08/2006 instead of US 5557067 A (see sheet 2 of 5 of IDS dated July 26, 2006, reference number 22), and it has been considered by the Examiner. Chen ("International Journal of Satellite Communications and Networking", Volume 22, Issue 3, Pages 341 – 365, Special Issue: Special Issue on The DVB-S2 Standard for Broadband Satellite Systems. Issue Edited by Ulrich Reimers, Alberto Morello. Published Online: 16 Jun 2004), Applicant of the present Application, discloses the claimed invention.

The Examiner also has considered IDS filed on 07/25/2006. The reference presented in IDS filed on 07/25/2006 is not part of the file of the present Application, but it was found in the references of Application Serial No. 10/068047 that is assigned to the same assignee.
